

# Visual Tracker

The GPS navigation onboard device that makes it easy the fleet management

Visual Tracker is an advanced satellite phone app to simplify and enhance vehicles activity (whether you are delivering people or goods).

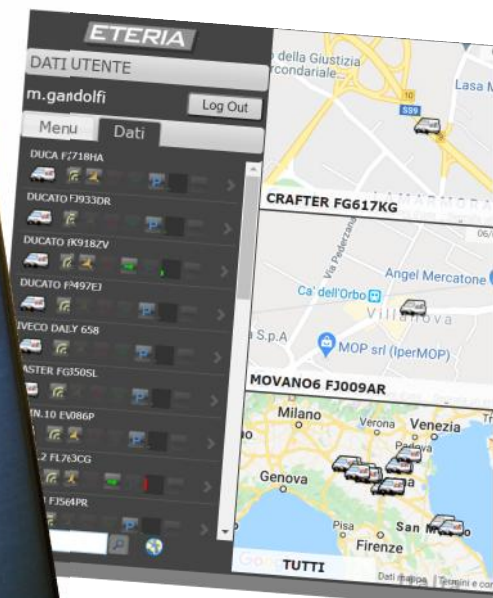

Messages can be exchanged between the office and the drivers using the touchscreen, with an unlimited number of interactions.

Visual Tracker can be installed on the driver's company phone through a very simple procedure, similar to a common app (Google Store).

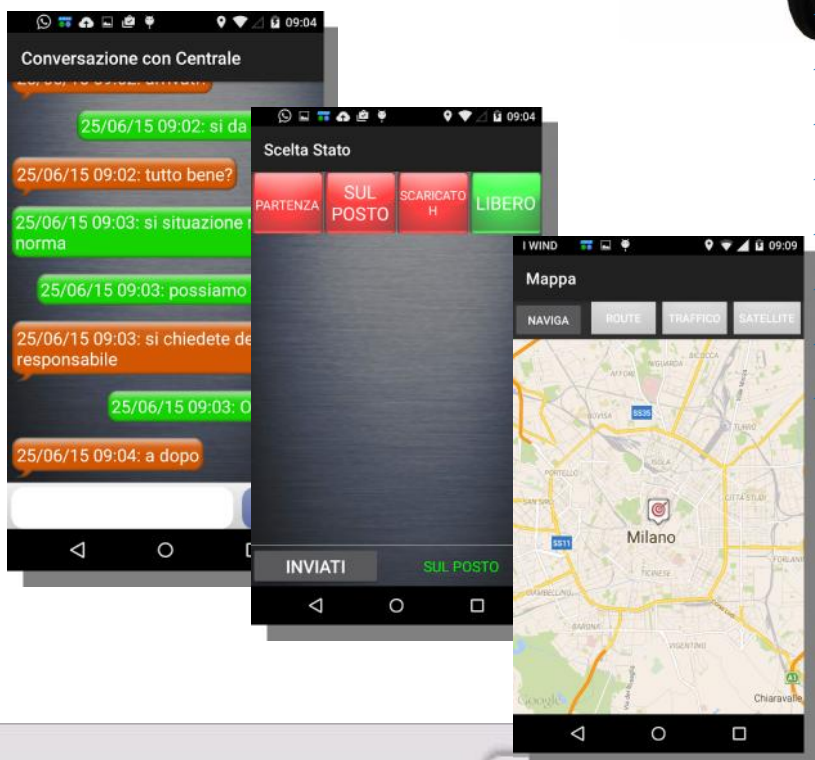

As standard it is supplied integrated with the Google Maps satellite navigator, which can therefore work in Europe and all over the world.

Hardware needed to use the Visual Tracker is a common mid-range Android operating system, with GPS, data link and touchscreen. Once installed, the app connects automatically to the cloud.

Work status buttons customization, vehicle status monitor, configuration interface and integration with the company management system are also available, even coming to delivery notes and invoices automatic generation.

- ✓ Work status button panel
- ✓ Automatic delivery notes
- ✓ Google Maps integration
- ✓ Real time messaging
- ✓ Remote navigator set
- ✓ Historical vehicle route
- ✓ Scheduled deliveries
- ✓ Crew activity details
- ✓ Automatic invoicing
